SUMMARY

Cybersecurity enthusiast pursuing postgraduate studies in Cybersecurity, seeking to apply academic knowledge and practical skills in an entry-level role. A quick learner and critical thinker with a collaborative mindset, eager to contribute to meaningful security initiatives while continuing to grow professionally.

SKILLS

Programming Languages: Python, Java, Bash

Security Tools: Nmap, Wireshark, Burp Suite, OWASP ZAP, SIEM & Splunk

Operating Systems: Linux, Windows

Cloud Platforms: AWS

Networking Concepts-OSI model, TCP/IP model, TCP/UDP, DNS , DHCP, HTTP/S.

Databases: MySQL

Tools: Git, VS Code

EDUCATION

- | | |
|---|------|
| • Manipal School of Information Sciences (MSIS), Manipal
M.E. in Cybersecurity
(Jul 2025-Present) | 8.36 |
| • GM Institute of Technology, Davangere
B.E in Computer Science & Engineering
(Dec 2021-May 2025) | 8.03 |

PROJECTS

“DDoS attack and detection in SD-IOT network using ML”

Tools used: Mininet, Mini-Edit , Ryu, Python, hping3, Wireshark.

- Designed and developed an ML-based DDoS detection system for SDIOT networks by analysing traffic features such as packet rate, flow duration, and source IP behaviour.
- Implemented a Random Forest classifier integrated with a Ryu SDN controller in a Mininet-based IoT network to accurately classify normal and malicious traffic.
- Enabled real-time DDoS mitigation using SDN centralized control by dynamically blocking malicious flows, improving network availability and resilience.

“Web application vulnerability assessment”

Tools Used: OWASP ZAP, Burp Suite.

- Developed an intentionally vulnerable web application to simulate real-world security flaws for assessment practice.
- Performed automated and manual vulnerability testing using OWASP ZAP and Burp Suite to identify SQL Injection, XSS, Broken Authentication, and misconfigurations.
- Remediated identified vulnerabilities by applying secure coding practices and strengthening overall application security.

RELEVANT EXPERIENCE / EXPOSURE

- Hands-on experience in network traffic analysis using Wireshark
- Basic understanding of incident detection and response workflows
- Familiar with log monitoring and alert-based systems
- Exposure to Linux system operations .

CERTIFICATES

Foundations of Cybersecurity - Google

Crash course on Python - google

AI for Cybersecurity – 28DIGITAL

Burp Suite Unfiltered : Go from a Beginner to Advanced – Packt

Java Full Stack Certification – Pentagonspace Private Limited, Bengaluru
